

## Vancouver's Seawall & Seaside Part II ( Science World, Granville Island, Vanier Park) ~ January 9, 2022

This outing was originally scheduled on Saturday January 8<sup>th</sup> which weather forecasted to be raining and snowing day. We changed to the next day January 9 which had more favorable weather forecast. On Sunday when 7 of us met at Creekside Community Recreation Centre (close to Science World), we were very happy we got a sunny and comfortable warmer day for our outing.

We started our walk from Creekside Community Centre to Granville Island for a short water stop, then continue onward to Vanier Park for our lunch with breathtaking beautiful view. After lunch, we retraced back and finish our walk on Granville Island for people who like to spend more time there or came back with the group to Science World station.
