

On a beautiful summer day, our group started near the Squamish golf course. After visiting the confluence of Mashiter Creek and the Mamquam, we proceeded downstream passing many scenic areas.

The trail ends at the gorgeous meeting point of the Mamquam and Squamish Rivers, where we stopped to admire the beauty of this area. Our second hike began at Smoke Bluffs where many rock climbers were visible scaling the sheer granite slabs. We stuck to the trails and were rewarded with great views of Squamish and its surrounding region.
